To Whom It May Concern:

Good day I'm the assistant branch manager at Airgas USA, LLC. We are a customer service now industry. Our mission is to consistently keep our customers in motion and with minimal downtime. The bar is set to an apex in order to maintain optimal service to our end users. With 7 trucks in our fleet that must meet all DOT specifications in preventative maintenance also in our paperwork.

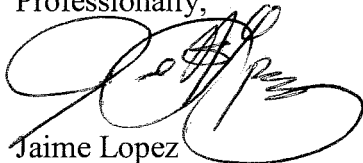

This now brings me the reason to the creation of a recommendation for Onsite Fleet Svc. As stated previously the bar is set to an apex in order for our end users be met and satisfied. Our vendors are also expected to meet this goal at all times since business doesn't rest. The turn around time for my fleet with Onsite is concise in timing whether early morning or late evenings they're techs are here.

I highly recommend Onsite Fleet Svc. due to there ability of not only managing our fleet but in making Airgas feel as we are there only client.

For instance this past Monday I had a truck that was down due to an overhaul on a lift gate and another needing an PM maintenance. No more after having this request with Laura a tech was here to service. Downtime doesn't happen with Onsite Fleet Svc.

Furthermore I have to state that both Laura and Trey are the concise one two punch in service and reliability. Please feel free to contact me directly to my E-mail above or via my cell at (863).581.5823.

Professionally,

Jaime Lopez
Asst. Branch Manager
